EDUCATION

Western University

London, ON

Bachelor of Arts, Economics

Sep 2024 - Aug 2028 (Expected)

Relevant Coursework: Foundations of Financial Economics, Risk and Financial Institutions, Econometrics I & II, Managerial Economics, Intermediate Microeconomics, Intermediate Macroeconomics

Honours & Awards: Continue in Canada Scholarship; Dean's Honour List

PROFESSIONAL WORK EXPERIENCE

ValueSystem Asset Management

Seoul, South Korea

Intern, Asset Management Division

May 2026 - Aug 2026

- **Investment Research & Presentations:** Attended 12 company investor relations sessions per week, synthesized findings, and presented investment themes and companies of interest at weekly meetings with portfolio managers and senior leadership.
- **Technical & Sector Analysis:** Combined sell-side industry research with trading-platform chart analysis to examine historical price patterns of market-leading stocks, including 20-week moving averages; presented findings at investment meetings.
- **AI Infrastructure Research:** Compared earnings calls, capital expenditure guidance, operating cash flow and AI infrastructure strategies across Amazon, Alphabet, Meta and NVIDIA; presented analysis of spending plans and cash generation.
- **Portfolio Risk Management:** Observed portfolio managers evaluate loss thresholds, stop-loss timing and portfolio rebalancing across institutional client funds during summer 2026 equity-market volatility.
- **Corporate Presentation Development:** Collaborated with the corporate planning team to map departmental responsibilities and co-develop content for the firm's corporate presentation.

RESEARCH & CONFERENCE ACTIVITIES

Midas Capital

London, ON

Equity Analyst, Industrials

Sep 2026 - Present

- **Sector Coverage:** Screen US industrials across electrical equipment, power infrastructure, and aerospace & defense, focusing on AI data-center power demand, grid capital expenditure and defense spending; cover Eaton (NYSE: ETN) and GE Vernova (NYSE: GEV).
- **Valuation & Transaction Analysis:** Evaluated \$500M–\$2B enterprise value ranges across multiple companies using DCF, sensitivity, and downside-case analyses informed by consensus estimates, company guidance, and 15+ trading comparables.
- **Investment Analysis:** Developed 6+ investment cases with DCF, trading comparables, catalyst analysis, and bull/base/bear scenarios; assessed key risks and modeled 20%+ upside/downside sensitivity to operating assumptions.

Automated DCF Model

Seoul, South Korea

Built for Paratus Investment

July 2026 - Sep 2026

- Built an automated DCF and financial analysis workflow to support valuation and transaction advisory, integrating operating forecasts, cash flow analysis, and sensitivity testing.
- Used Python, pandas, NumPy, and Excel automation to standardize recurring modeling tasks and improve consistency across valuation and diligence workstreams.

ENTREPRENEURIAL PROJECTS

[SUPERDUPERCATAL](#), [PNexus](#)

Applied to Y Combinator, Winter 2027 Batch | Sep 2026

New York, USA
July 2026 - Sep 2026

- Built an AI-driven content production and distribution system using OpenAI, Runway, and Midjourney APIs, automating ideation, asset generation, and short-form video production.
- Scaled the account to 25K followers, with 7M+ peak views and roughly 500K average views per reel, validating low-cost organic distribution and rapid content experimentation.
- Participated in system planning and business operations, including initiatives to maximize operating margins, identify cost-reduction opportunities, and support the management of a small business
